

Megapower MG80

MEGAPOWER MG80

The Megapower Model MG80 is a DLP projector with HDTV 1920 x 1080 Resolution and a contrast of 1000:1. A horizontal and vertical keystone correction ensures easy image setup. 287 cm image width will be able to illuminate the projector easily. If room light is available then the image width should not exceed 191 cm. In addition, the Bluetooth option is a useful addition to the projector, especially for wireless audio transmission. Even video signals 1080P are no problem for the projector. The only 29 decibels operating noise make the projection quiet.
