The standard portable Artlii Energon2 LED LCD projector has 340 Ansi lumens and a HDTV 1920 x 1080 resolution. It is an LED projector with 30000 hours of light life, which means over 20.5 years of use with four hours of enjoyment every day. The integrated media player can play files directly. As the projector has horizontal and vertical keystone correction, the projector can be set up with plenty of free space in the room. The projector can illuminate a picture width of up to 187 cm thanks to its 340 Ansi lumens. In room lighting, however, the picture width should ideally be less than 125 cm. The model recognizes Airplay, Miracast Screen Mirroring signals, so it is possible to play videos with high resolution and surround sound directly via WLAN from a smartphone, tablet or PC (Android, Windows and iOS). Thanks to the Bluetooth function, the projector can also be flexibly paired with other speakers. The model is also compatible with Full HD 1080P and 4K (compressed).
