Features

The Hughes-JVC D330 ILA projector has 2500 Ansi-Lumen, a contrast of 300:1 and a HDTV 1920 x 1080 resolution. A built-in horizontal and vertical keystone correction provides freedom when positioning the projector. Thanks to the brightness of 2500 Ansi lumens, a picture width of 508 cm is possible. In room light, the picture should be max. 339 cm wide. In the event that the image is still too small, the projector offers integrated edge blending software, with which several projectors can project a large image together. The model is no longer offered by Hughes-JVC, but is still a popular projector in our database.
