The Jmgo N5S Ultra Max Home Theater 3D Laser DLP projector features 5,040 ANSI lumens, a native contrast ratio of 10,000:1, and a UHD (4K2K) 3840 x 2160 resolution. Thanks to its laser technology, the projector has a light source lifespan of up to 20,000 hours, which would equate to over 13.7 years at 4 hours per day. The built-in lens shift provides flexibility when setting up the projector. Since Jmgo specifies the projector's brightness in lumens, we have calculated an approximate ANSI lumen value in this case. An image width of up to 880 cm is possible, as the projector has 5,040 ANSI lumens. In rooms with ambient light, the projector can achieve a smaller image width;
