

KIANO Alpha Kid Cat

KIANO ALPHA KID CAT

The KIANO Alpha Kid Cat model is an LCD LED projector with HDTV resolution of 1280 x 720 and a contrast ratio of 1400: 1. The manufacturer, KIANO, specifies a lifespan of 30,000 hours, which would equate to over 20.5 years based on 4 hours? viewing per day. Built-in horizontal and vertical keystone correction offers flexibility when setting up the projector. The projector is capable of illuminating a screen width of 144 cm effectively. However, if there is ambient light in the room, the screen width should ideally not exceed 96 cm. Thanks to the integrated Android TV software, it offers direct access to a wide range of streaming services such as Netflix, Disney+, Amazon Prime Video and YouTube, as well as games and other interactive content. The model recognises AirPlay and Miracast screen mirroring signals, making it possible to play high-resolution videos with surround sound directly via Wi-Fi from a smartphone, tablet or PC (Android, Windows and iOS). Another bonus worth mentioning is that the projector?s Bluetooth function allows it to be connected to external wireless speakers. Furthermore, the projector can play 1080p content without any issues. Compared to other models, the projector is very quiet, with an operating noise level of 26 decibels.
