

LG PH150B

LG PH150B

The PH150B LED LCOS projector from LG has 130 Ansi lumens, a contrast of 100000:1 and an HDTV 1280 x 720 resolution. The lifespan of the LEDs is 30000 hours, which is over 20.5 years with a daily viewing time of 4 hours. The projector is equipped with an integrated media player, so direct playback of files will not be a problem. The projector can illuminate images up to 116 cm wide thanks to its 130 Ansi lumens. In room lighting, however, the picture width should ideally be less than 77 cm. The rechargeable projector is not dependent on a direct power source and can therefore be set up very quickly, freely and spontaneously. As the projector recognizes Miracast screen mirroring signals, it is possible to play videos with high resolution and surround sound directly via WLAN from a smartphone, tablet or PC (Android, Windows and iOS). The projector can also play 1080P without any problems. The model built in 2017 is no longer offered by LG, but is still very popular in our projector database.

Brief Introduction

Beta 2.5

Display Type

LCoS
HDTV 16/9 Liquid Crystal on Silicon (LCOS)
