

Megapower ML80

MEGAPOWER ML80

Brief Introduction

Beta 2.5

A brief introduction to the Megapower ML80. The game-portable DLP LED projector has a WXGA 1280 x 800 resolution and a contrast of 2000:1. The manufacturer Megapower specifies a service life of 30,000 hours, which equates to over 20.5 years at 4 hours of use. Including an integrated media player with which files can be played directly. An image width of up to 176 cm is possible as the projector has 300 Ansi lumens. However, if there is room light, the image should be a maximum of 117 cm wide. The HDMI MHL (Mobile High-Definition Link) port allows 1080p / 60 Hz image mirroring (screen mirroring) to be transmitted from the smartphone while it is being charged at the same time via the connection. This model is no longer offered by Megapower.
