

miroir M1200S

M I R O I R M 1 2 0 0 S

A brief introduction to the M1200S: The miroir standard portable LED DLP projector offers 1000 Ansi lumens a contrast of 400:1 and a HDTV 1920 x 1080 resolution. It is an LED projector with 30000 hours of light life, which is over 20.5 years with four hours of use every day. Thanks to the brightness of 1000 Ansi lumens, a picture width of 321 cm is possible. In room light, the picture should be max. 214 cm wide. The rechargeable projector is not dependent on a direct power source and can therefore be set up very quickly, freely and spontaneously. The model recognizes Miracast screen mirroring signals, so it is possible to play videos with high resolution and surround sound directly via WLAN from a smartphone, tablet or PC (Android, Windows and iOS). The projector can also play 1080P without any problems. With an operating noise of just 29 decibels, the model is very quiet compared to others.
