

Prixton Dalí

P R I X T O N D A L Í

Brief Introduction

Beta 2.5

With the Dalí, manufacturer Prixton offers a micro-portable LCD LED projector featuring HDTV resolution (1920 x 720) and a contrast ratio of 500:1. Thanks to its LEDs, the projector has a specified light source lifespan of 30,000 hours, which would amount to over 20.5 years based on 4 hours of daily use. It includes a built-in media player that allows files to be played directly. The projector can effectively illuminate an image width of up to 170 cm thanks to its 110 ANSI lumen output. However, in room lighting, the image width should ideally be less than 113 cm. The model supports AirPlay and Miracast screen mirroring, making it possible to stream high-resolution videos with surround sound directly over Wi-Fi from a smartphone, tablet, or PC (Android, Windows, and iOS). The projector can also handle 1080p content with ease.
