

Valerion VisionMaster Max

Top 10

The VisionMaster Max 3D DLP projector from Valerion has 3360 ANSI lumens, a contrast ratio of 4000:1 and a UHD (4K2K) 3840 x 2160 resolution. The integrated media player allows you to play files directly. The projector also offers a lens shift function for flexible projection adjustment without loss of quality. Since Valerion indicates the brightness of the projector in lumens, we have calculated an approx. Ansi-Lumen value in this case. The brightness of 3360 Ansi-Lumen allows a screen width of 589 cm. In room light, the image should be max. 393 cm wide. Thanks to Google TV, the projector can be conveniently controlled by voice command. Since the projector recognises Chromecast, Airplay, Miracast Screen Mirroring signals, it is possible to play videos with high resolution and surround sound directly from a smartphone, tablet, PC (Android, Windows and iOS) via WLAN. Another extra to be mentioned is that the projector can be connected to external wireless speakers via Bluetooth. Furthermore, the projector can play 1080P and 4K without any problems.
