

# Valerion VisionMaster Plus

The Valerion VisionMaster Plus 3D DLP projector has 1680 ANSI lumens, a contrast ratio of 3000:1 and a UHD (4K2K) 3840 x 2160 resolution. The projector is equipped with an integrated media player, so playing files directly will not be a problem. Since Valerion indicates the brightness of the projector in lumens, we have calculated an approx. Ansi-Lumen value in this case. The brightness of 1680 Ansi-Lumen allows for a screen width of 416 cm. In a room with ambient light, the image should be max. 277 cm wide. Google TV turns the projector into a versatile media hub that can be seamlessly integrated into a smart home. The projector has Chromecast, Airplay, Miracast Screen Mirroring support, which allows high-resolution video and surround sound to be played directly from smartphones, tablets and PCs running Android, Windows or iOS over Wi-Fi. Another extra to be mentioned is that the projector can be connected to external wireless speakers via the Bluetooth function. Playing 1080P and 4K is also no problem for the projector.
