

VISSPL 4K

VISSPL 4K

Brief introduction of the VISSPL 4K. The LCD LED projector has a HDTV 1920 x 1080 resolution and a contrast of 15000:1. The manufacturer specifies an LED lifespan of 30000 hours, which would be the equivalent of over 20.5 years at 4 hours a day. Horizontal and vertical keystone correction makes image setup a breeze. A screen width of up to 249 cm is possible because the projector has 600 ANSI lumens. However, if there is room light, the image should be no more than 166 cm wide. The model recognises Airplay, Miracast Screen Mirroring signals, so it is possible to play videos with high resolution and surround sound directly from a smartphone, tablet or PC (Android, Windows and iOS) via Wi-Fi. Whats more, the projector can be flexibly connected to other speakers thanks to the Bluetooth function. Video signals 1080P and 4K (compressed) are also no problem for the projector.
