

Vivitek DU709EZAA

VIVITEK DU709EZAA

Brief introduction of the Vivitek DU709EZAA. The DLP laser projector has a WUXGA 1920 x 1200 resolution and a contrast of 20000:1. It is a laser projector with 20000 hours of light life, which is over 13.7 years with a daily viewing of 4 hours. The built-in lens shift and keystone correction function brings freedom in projection adjustment. Thanks to the brightness of 7000 Ansi lumens, an image width of 850 cm is possible. The projector can also handle slightly brighter rooms with a narrower image width (we recommend max. 567 cm). A smartphone with an MHL connection can be connected directly to the MHL/HDMI port for 1080p / 60 Hz image mirroring (screen mirroring). Playing 1080P and 3D is also no problem for the projector, and it even has the option of projecting HD 1080P Blu-rays onto the ceiling using 360° projection. It was launched in 2018 and is no longer offered by the manufacturer Vivitek.
