

XGIMI AURA 3 Max

XGIMI AURA 3 MAX

The AURA 3 Max 3D Laser DLP projector from XGIMI has 7,125 ANSI lumens, a native contrast ratio of 8,000:1, and a UHD (4K2K) resolution of 3,840 x 2,160. Thanks to its laser technology, the projector has a specified lamp life of 30,000 hours, which would equate to over 20.5 years at 4 hours of use per day. Horizontal and vertical keystone correction provides flexibility during setup. Since it is a short-throw projector, it can be placed very close to the wall. To project a 2-meter-wide image, the projector needs to be just 33 cm away from the screen. Since XGIMI specifies the projector's brightness in lumens, we've calculated an approximate ANSI lumen value in this case. Thanks to Google TV, the projector can be conveniently controlled via voice commands. The projector supports Chromecast and screen mirroring, allowing you to stream high-resolution videos and surround sound directly from smartphones, tablets, and PCs running Android, Windows, or iOS via Wi-Fi. In addition, thanks to its Bluetooth functionality, the projector can be easily paired with other speakers. Playing 1080p, 4K, and 3D content is also no problem for the projector, meaning it can recognize all currently available Blu-ray formats.
